Abstract	i
Zusammenfassung	ii
Contents	iv
List of figures	viii
List of tables	xiii
1. Introduction.	1
2. International research activities at Merapi	3
2.1. Applied Methods	3
2.1.1. Geology	3
2.1.2. Geochemistry	3
2.1.3. Geophysical investigations	4
2.1.3.1. Seismic investigations	4
2.1.3.1.1. Passive seismic investigations	4
2.1.3.1.1.1. Seismic activities within the volcano edifice	4
2.1.3.1.1.2. Teleseismic activities	4
2.1.3.1.2. Active seismic experiments	5
2.1.3.2. DC Resistivity observation	5
2.1.3.3. Magnetotelluric and electromagnetic observations	5
2.1.3.4. LOTEM	6
2.1.4. Deformations	6
2.1.4.1. Tilt and deformation observations	6
2.1.4.2. Kinematic GPS	7
2.1.4.3. Electro-optical distance measurements (EDM)	7
2.2. Gravity observations	7
2.2.1. Mapping of the gravity in space	8
2.2.1.1. Digital elevation models	8
2.2.1.2. Gravity measurements	8
2.2.2. Gravity changes in time	9
3. Theory	10
3.1. Elementary theory of Earth's gravity field	10
3.1.1. Newton's law	10

3.1.2.	Gravitational potential	11
3.1.3.	Gravity gradient	12
3.2.	Gravity Disturbances	13
3.2.1.	Normal gravity $\gamma$	13
3.2.2.	Free air disturbance	15
3.2.3.	Bouguer disturbance	16
3.2.4.	Complete Bouguer disturbance	17
3.3.	Interpreting gravity disturbances	18
3.3.1.	Analytical interpretation methods	18
3.3.2.	Integration methods for mathematically described bodies	19
4.	Modelling of gravity attraction	21
4.1.	Gravity anomalies from bodies with simple geometric shapes	21
4.1.1.	Vertical gravitational attraction of a sphere	21
4.1.2.	Vertical gravitational attraction of a thin rod	22
4.1.3.	Vertical gravitational attraction of a rectangular prism of cross section $\Delta A$	24
4.1.4.	Vertical gravitational attraction of a rectangular parallelepiped	25
4.1.5.	Vertical gravitational attraction of a thick vertical cylinder	27
4.2.	Alternative model of Merapi volcano	34
4.2.1.	Combination-model: sphere and dipping thin rod	34
4.2.2.	Combination-model: sphere and vertical thick cylinder	38
4.2.3.	Gravity changes due to groundwater changes	41
5.	Repeated gravity measurements at Merapi volcano	45
5.1.	The repetition gravity and GPS-network	45
5.2.	Equipment	47
5.3.	Processing of the gravity and height observations	48
5.3.1.	Theory of Grav	48
5.3.2.	Gravity and height values of five measurement campaigns	50
6.	Gravity and height changes around Merapi	52
6.1.	Gravity changes $\Delta g$	52
6.1.1.	Gravity changes $\Delta g$ relative to campaign Merapi I in August '97	52
6.1.2.	Gravity changes $\Delta g$ between particular epochs	56
6.2.	Height changes $\Delta h$	60

6.2.1.	Height changes $\Delta h$ relative to campaign Merapi I in August '97.	60
6.2.2.	Height changes $\Delta h$ between particular epochs	64
7.	Models to explain gravity changes on Merapi volcano	68
7.1.	Model 1: Sphere and dipping thin pipe	68
7.2.	Model 2: Sphere and vertical thin pipe	73
7.2.1.	Vertical gravity effects at the third loop stations (top of Merapi > 2900 m)	73
7.2.2.	Vertical gravity effects at the north flank	77
7.2.3.	Vertical gravity effects at the second loop stations (850 – 1500 m)	78
7.2.4.	Vertical gravity effects at the first loop stations (130 – 650m)	79
7.3.	Model 3: Sphere and vertical thick cylinder	80
7.3.1.	Vertical gravity effects at the third loop stations (top of Merapi > 2900 m)	80
7.3.2.	Vertical gravity effects at the north flank	83
7.3.3.	Vertical gravity effects at the second loop stations (850 – 1500 m)	84
7.3.4.	Vertical gravity effects at the first loop stations (130 – 650m)	85
7.4.	Modelling of water table changes	87
8.	Discussion and Interpretation	92
9.	Conclusion	94
Appendix A. Computer programs written with MATLAB		96
A.1.	Program grav_sphere.m	96
A.2.	Program grav_thin_rod.m	96
A.3.	Program grav_prism.m	97
A.4.	Program grav_rectangular.m	98
A.5.	Program grav_cylinder_1.m	99
A.6.	Program grav_cylinder_2.m	100
A.7.	Program grav_sphere_rod.m	102
A.8.	Program isomap1.m and isomap2.m	105
A.9.	Program grav_sphere_cyl.m	106
A.10.	Program concentric_cyl.m and optim_density.m	112
